VIRGINIA
EXTERIOR PRODUCTS

James Hardie Fiber Cement Siding
Insulated Vinyl Windows • Insulated Vinyl Siding
Vinyl Railings, Columns, Entry Doors and Shutters

The **ULTIMATE** Siding

We specialize in exterior products that meet both the high standards of building professionals and the ever-increasing expectations of homeowners. We stock, sell, and service a comprehensive line of products for residential and professional builders and remodeling contractors.

Maintenance Free! No scraping, sanding or painting.

Colors are virtually fade-free!

Revolutionary technology finish offers superior resistance to fading far beyond any other vinyl siding in the market.

The Polar Wall Exterior System features a foam laminated backing for added strength and rigidity. Panels, once installed, create a hard, firm wall of protection against weathering elements and high winds.

The combination of solid vinyl siding and foam lamination give the Polar Wall Exterior System greater impact resistance to better absorb the shock of impacting objects. Versus non-reinforced panels, Polar Wall can provide up to **300% more impact resistance**.

A Permeable Water Vapor Solution - Helps restore healthy breathing to your home. It's designed to allow water vapor to escape through the foam and dissipate into the air, keeping moisture away from the interior walls. The Polar Wall Plus! Exterior System has a permeability rating of 5.0. That's up to 5 times more than most house wraps!

Fullback Thermal Support System

- Eliminates hollow voids and adds rigidity to siding.
- Wraps your home in a "Wall of Protection" and completely eliminates the air gap between your exterior wall
- Eliminates drafts - no hot spots from summer heat, no cold spots from wintry weather.
- Provides four times the "R" value of conventional siding underlayments.

- Fluctuations in temperature make siding expand and contract. These movements can cause wall lines to sag and seams to open up, giving siding an artificial appearance. Wind can penetrate hollow voids under the siding, lifting and bending it.
- Fullback fills in the voids completely adding rigidity, so seams remain practically invisible, and the siding resists wind damage.
- Fullback allows walls to breathe, and will not trap harmful water vapor. Because Fullback does not trap moisture within the wall, it does not support the growth of mold and mildew.

Pests Termites and other pests can compromise the performance of your home's insulation.

- Fullback repels termites and carpenter ants with Perform Guard®, a patented additive made with Borate, a non-toxic, naturally occurring mineral.
- Siding underlayment without Perform Guard® can be a perfect habitat for termites.
- Proven effective and safe to humans and pets, Perform Guard® is deadly to termites when they chew it.

The **ULTIMATE** Door

Entry Doors

Our compression weather-strip forms a weather-tight seal. The resilient foam is impervious to moisture and maintains its shape. We offer high-performance weather-strip and bottom sweep upgrades to further strengthen your weather barrier of your entry. Polaris decorative glasslites are hand assembled by craftsmen. Wavy textures, tiny bubbles and other natural effects of art glass all reflect light differently. The metal framework is filled with moving light. The result is a unique, quality work of art.

Patio Doors

Smooth gliding, solid steel zinc-plated tandem rollers, with an iridium coating on exposed parts to protect against corrosion. Products put through rigorous testing at our in-factory testing facility. R&D ensures our products are top quality.

A strike of 100 lbs. broke the wood-edge stile and opened the door.

To open the steel-edged door it required 7 strikes of 100 lbs. of pressure.

The **ULTIMATE** Window

Our windows are virtually air tight with air infiltration ratings as low as .01. They perform up to 30 times better than competitors.

True Sloped Sill

Rain runs straight off the sloped sill away from the home - no weep holes to clog.

Continuous Interlock

Meeting rails join with a continuous over & under interlock. Condensation and air filtration are reduced.

Maintenance Free Vinyl

Our virgin vinyl formulation stays smooth and color fast. Vinyl performs as well or better than framing materials like wood or aluminum when measuring the rate of heat flow.

More Distinctive Features

Intercept® "warm-edge" glass spacer system. Tilt-in sash locks - safe cleaning inside home. Limit locks - secure partial opening. Heavy duty cam-action sash locks - secure, air tight. Lift rails are part of sash extrusion.

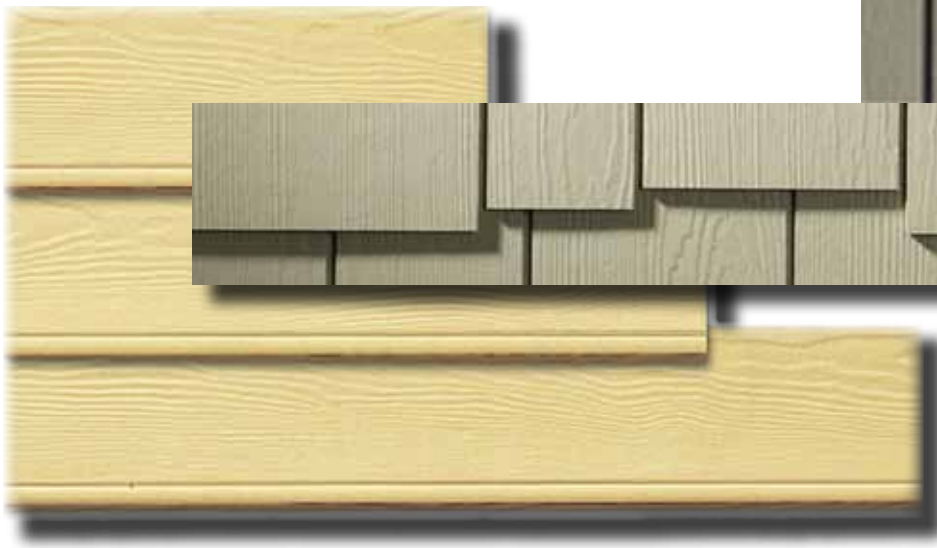

James Hardie Fiber Cement Siding

HardiePlank lap siding is the most popular brand of siding in America and can be found on over 5.5 million homes. With its strength, beauty and durability, HardiePlank lap siding enhances and protects homes in all kinds of climates—and now, with the HardieZone® System, James Hardie provides fiber cement siding with specific performance attributes relative to the climate where the siding product is being used. James Hardie now gives you the optimum siding for your home and climate, regardless of location.

All HardiePlank lap siding comes in a variety of looks and textures, all of which are Engineered for Climate®. We are so sure about how well the HardieZone system will perform, HardiePlank lap siding comes with a 30-year nonprorated, transferable, limited warranty—our strongest warranty ever.

HardieWrap® weather barrier is an innovative, higher performing weather barrier that is engineered for climate so you get the right wrap as the second line of defense for your home, no matter where your home is located. From James Hardie, maker of America's #1 brand of siding. HardieWrap weather barrier provides a balance of water resistance and breathability, allowing moisture (water vapor) from inside your building to escape so the area within the wall stays dry.

Why James Hardie® Siding Products?

Before you decide what type of siding material is right for your home, take a look at the value you'll get with James Hardie siding products with ColorPlus technology:

- A longer paint cycle that can help save you up to \$5,000 (on average) over 15 years*
- The #1 return on investment and superior siding value for remodeling projects, (*Remodeling Magazine's* annual "Cost vs. Value Report," 2012-13)
- Lower homeowner insurance premiums (14% lower on average) compared to vinyl siding**
- No need to hire - and pay for - an additional on-site painting contractor
- Up to a 30-year limited transferable product warranty, as well as a 15-year finish warranty covering both paint and labor***
- No waiting for optimal weather conditions to finish and start enjoying your James Hardie-sided home
